### Challenges Faced

#### Facing a Time Crunch

With a large 1:1 district-wide rollout approaching, they had no easy way to distribute devices or collect fees.

#### Non-integrated Solution

Attempting to manage their processes using the library system, spreadsheets and manual paperwork was inefficient.

#### Lack of Centralized Processes

Each school was operating on different processes which made it difficult to manage from a central location.

### How We Helped

#### Standardized Methods

The system provided a central location of all asset, user and help desk data which streamlined processes.

#### Simplified Day-to-Day Processes

Using a centralized system that was easy to manage helped staff be more effective and efficient.

#### Shortened Learning Curve

With a single system to learn, new users could be up and running in the system in 15-20 minutes.
